

ECO Plus Developer

Medium Activity Developer

Formulated for consistency and stability with an affordable price

Delivers high quality images, incorporates important health, safety and environmental benefits

Reliable Performer

FR ECO Plus, a multi-purpose performer with all brands of general medical imaging films, including Agfa, Fuji, Kodak & Konica. The unique two-part developer concentrate is formulated to deliver medium activity while providing consistent diagnostic quality with both general medical and laser imaging films. Complete compatibility with 90 & 180 second processing cycles.

Technical Information (working solution)

pH (at 80°F / 27°C)	10.45 to 10.55
Specific Gravity	1.069 to 1.079

Quality you can count on

Consistent batch-to-batch quality, eliminates image fluctuations, which may require exposure or processing modifications.

Quick Easy Mixing

Two concentrate parts nested in the innovative Unipak bottle facilitate fast solution mixing while minimizing the chance of mixing errors.

Unipak concentrate bottle templates are available for the popular White Mountain IS199 mixer.

Non-Hazardous Formulation

The concentrate solutions are categorized as both non-corrosive and non-hazardous, thus safer and easier to use. Traditional 3-part formulations typically have corrosive parts B and C.

The OSHA PEL limits for this product is "non-applicable" which means there is no known exposure risk.

Complexed hardener eliminates hazards to skin and lung tissue.

As a result, **FR ECO Plus** helps to create a healthier, more pleasant working environment.

Low Odor

Elimination of acetic acid and uncomplexed hardener eliminates unpleasant mixing odors. Working area odors are further reduced with the use of **FR MF2 Universal Fixer Replenisher**. Available in a cost effective 2-part concentrate to make 10 gallons of solution.

Order in two convenient sizes

To Make 10 Gallons: Catalog # 44-506
To Make 200 Gallons: Catalog # 42-776

Easy Shipping

Customer shipment transportation surcharges are eliminated due to the non-hazardous formulation designation.
